

Leather Face String Knit Gloves

This is not your ordinary glove. Traditional leather work gloves never quite fit right. Sidewall's patent pending construction and design have changed that. They're sewn on a seamless knit shell to conform to your hands shape exactly. Traditional leather fitter gloves have 11 seams that annoy and rub. Superior's Sidewall has just 1, bomb proof, but subtle seam, so you won't even feel it. Traditional work gloves have a back that barely breathes and traps sweat in. The Sidewall has a breathable knit, cotton back, keeping your hands cool and comfortable. Plus Sidewalls are made with *True Hand Technology™*, improving the fit, dexterity and comfort even more.
